

# Avon Sailing Club

## Health & Safety Policy

Avon Sailing Club aims to provide a safe and healthy environment for its members and visitors. It also pays due consideration to members of the public, who may use the Public Right of Way through its site.

Through its policies and procedures, the Club aims to identify and reduce risk associated with its activities as far as is reasonably practicable. These Policies and procedures will be reviewed on a regular basis by the General Committee and updated to reflect current legislation and the practical experience at the Club.

Whilst the Club takes responsibility for providing a safe and healthy environment, as far as is reasonably practicable; Club members take responsibility for their own safety, and that of others around them, when deciding to take part in club organised or independent activities.

Providing a safe and healthy environment is a priority for the Club; members and visitors are encouraged to raise any Health & Safety concerns with a Flag Officer so that they may be addressed.

The Club promotes continuous learning and improvement regarding Health & Safety and members are encouraged to support this through reporting all accidents and near misses.
